Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

1. Claims 4, 7, 8, 9, 14, 15, 17, 18, 25, 29, 30, 32, 33, and 39 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. In the aforementioned claims above, applicant has used improper Markush language.

Applicant is requested to use the language "selected from the group consisting of A, B, C and D etc." when listing a number of equivalent structural materials and catalysts. Suitable correction is required.

In claims 4, 25, and 35 applicant has claimed bitumen as well as asphalt. Bitumen is generic to asphalt and thus redundant. Bitumen is includes asphalt, but asphalt does not comprise all bituminous material. Correction is required.

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

The changes made to 35 U.S.C. 102(e) by the American Inventors Protection Act of 1999 (AIPA) and the Intellectual Property and High Technology Technical Amendments Act of 2002 do not apply when the reference is a U.S. patent resulting directly or indirectly from an international application filed before November 29, 2000. Therefore, the prior art date of the reference is determined under 35 U.S.C. 102(e) prior to the amendment by the AIPA (pre-AIPA 35 U.S.C. 102(e)).

3. Claims 1-10 are rejected under 35 U.S.C. 102(b) as being anticipated by Sasaki et al. or Doi et al. or Volke et al.

Each of the references above singularly discloses a composition comprising a vegetable oil which read on applicant's specific vegetable oils, a structural material which reads on applicant's specific structural materials and a catalyst which reads on applicant's specified catalyst materials. See Sasaki et al. claims 4, 8 and 11.

Art Unit: 1732

See Doi et al. Claim 18 and in the Specification, Column 7, lines 43 et seq. See Volke, Claim 15, the abstract and Column 1, 7th Paragraph.

4. Claims 1-10 are rejected under 35 U.S.C. 102(e) as being anticipated by Muller-Hartburg.

Muller-Hartburg teach a composition comprising a vegetable oil which read on applicant's specific vegetable oils, a structural material which reads on applicant's specific structural materials and a catalyst which reads on applicant's specified catalyst materials.[Note Claim 3 and Claim 9 and Column 3, lines 8-11]

5. Claims 11-39 are rejected under 35 U.S.C. 102(b) as being anticipated by Volke et al.

Volke et al. teach a method of mixing vegetable oil, structural material and a catalyst to make a composition which is compacted and cured. [See Column 3, Example 1]

6. Claims 11--39 are rejected under 35 U.S.C. 102(e) as being anticipated by Muller-Hartburg.

Art Unit: 1732

Muller-Hartburg teaches a method of mixing vegetable oil, structural material and a catalyst to make a composition which is compacted and cured.[See Column 5, lines 17-48]
